

Skilled Carpenters, Installers & Fabricators, Production Laborers – Traveling

Vertical Solutions, the nation's leading climbing wall design and manufacturing company, is looking for enthusiastic and skilled laborers, carpenters, installers and fabricators that can build and install some truly amazing indoor rock climbing gym projects. We need people that are hard-working, experienced in an array of construction/installation jobs, have the ability and willingness to travel nationally from project to project, and mix well with our culture of outdoor enthusiasts.

Quick overview:

Responsibilities:

- Carry out climbing wall construction and installation using a variety of methods, including concrete/structural footers, steel fabrication/installation, rough and fine carpentry, paint, and epoxy coating
- Communicate progress and arising problems with team leaders/project foreman

Qualifications:

- Self-motivated with the ability to operate without constant supervision
- Ability to travel 45 weeks a year
- High level of accountability and ability to effectively prioritize tasks
- Strong time management skills
- Adjust to changing assignments while working onsite

What we are looking for from you:

Ideal candidates should have an understanding and background in various aspects of project construction and installation, with experience in finish carpentry being a major bonus. We'd love you to have professional on-the-job construction training either as a jack-of-all-trades or finish carpentry, and provide your own basic hand tools and toolbox. Most shifts are M-F between 7a to 6p and averaging 50 hours per week, but the ability to work weekends with overtime is crucial for project completion in many cases. Most of our projects last between two-and four-months, with time-off during and in-between jobs. It is also imperative for our candidates to have the ability to work in a physically demanding environment including lifting heavy materials, safely and efficiently working at heights (on scissor lifts, boom lifts etc), and staying on their feet most of the day.

What we provide you as an employer:

Most climbing gyms are in major cities, so this job is a great way to make money working on challenging projects, while traveling to different parts of the US. Housing is provided in comfortable and nice Airbnbs. Motels and hotels are only used for very short term needs, as quality of life is extremely important to our company culture. Although extended personal time is supported and encouraged, we have no shortage of work for capable people. We are looking for candidates with long-term potential on our team. Additionally, Health Care options are provided after a short waiting period.

Our culture:

Most of our business is composed of outdoor enthusiasts, including climbers, mountain bikers, river rats, etc, that choose to take time off between jobs to travel and recreate. We absolutely encourage this lifestyle while working with us! Efficiency and productivity are our main priorities as a team, not just as individuals, so we expect our employees to make the most of your time here at work, as well as in your own personal lives. If you are simply looking for a job to match your lifestyle, by combing your skills and interests to build outside the box, and create big functional artistic structures, then this could be a fantastic fit for you. To apply, send us your resume to employment@verticalsolns.com.
